## Yuma, AZ., Company Hires New Marketing Team

Niche businesses often struggle to keep themselves ranked on search engines. Niche businesses in areas with high density find it is a daily struggle to stay one step above their competition.

The solution lies in an expert marketing team that will keep the company high on search results for their specific area, and for AquaSafe All Dry, they found the perfect company for the job.

AquaSafe All Dry is a [water damage and restoration specialty company serving Yuma, Ariz.](#), and the surrounding areas. They specialize in helping residential families and small businesses return to normal as quickly as possible after water damage.

“Light or catastrophic, it is of no matter to me and my team. We will come out and get started on your water damage quickly. With water damage, time is of the essence,” said Matthew Butler, owner of AquaSafe All Dry.

Butler refers to how quickly mold can set in after water damage. Black Mold in particular is common after water damage, and this mold is toxic and potentially dangerous to families.

Butler knew residents of Yuma would one day need some assistance with water damage, but he was concerned no one would be able to find him and his business in a search results page. He knew he needed a solution, and he found one in Soaring Away.

Soaring Away is a marketing group specializing in small businesses, niche businesses and targeted locations. They use a combination of successful, research proven techniques to help raise business search engine results to the vaulted first page, where 90 percent of people searching for a good or service go when looking online.

“Soaring Away picked me right up and started making recommendations and adjustments. I have already seen some of the results of their work not only online but also as people have discovered me. Work is certainly picking up, and this is a good thing in this pandemic,” continued Butler.

AquaSafe All Dry is available 24/7. Information on their services, including contact information, is on the website. Visit [www.yumawaterdamage.com](http://www.yumawaterdamage.com) for details.
